Welcome to VRF Data Collector. This is where you will collect data for state reporting, validate data, view error reports, and submit data to respective applications for certification.

Part 2: Starting a SIF Collection

With SIF there is no need to create files to upload. When you start a SIF collection all of the data for State Reporting will be collected from your student information system and sent to the VRF Data Collector. The SIF collection is equivalent to a district level file.

1. On the Collection Requests tab, click *Start Collection* in the current Student Reporting Collection.

Part 3: Viewing Errors

The validation exceptions report shows errors by record type and severity. All 'Fatal' errors must be corrected in order to move your data over to SRI. The 'Warning' column will include both regular warnings and critical warnings. A regular warning is an item that is usually not correct but could be in certain instances. You will need to look at the warning and determine whether or not it requires fixing. A critical warning is an item that will become an error in SRI unless corrected.

1. Viewing Errors/Warning on Screen

You may view validation exceptions pertaining to a specific record type or severity by clicking on an underlined link. To see all errors and warnings, click *Generate Full Validation Report* in red at the bottom of the chart. The default is set to open these reports on your screen using HTML.

Validation exceptions are listed by record type and exception severity.

To generate the exception report for one record type and/or exception severity click the link in the corresponding row and column.

Part 4 (OPTIONAL): Viewing Data Reports

Data should be moved into SRI to view reports as the reports in SRI are much more user friendly. However, sometimes it may helpful to view a report in VRF.

Log into VRF Data Collector (see Part 1 for details). If you are already in VRF Data Collector and not on the home screen, click *Collection Requests* in the upper left.

1. On the main screen in VRF Data Collector, click *Examine* under Actions in the correct collection area.

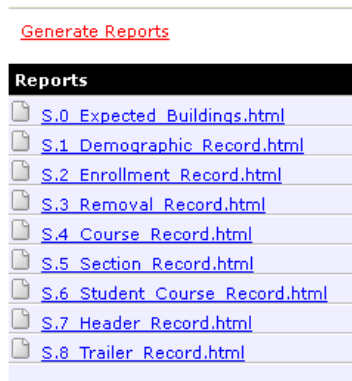

2. The box next to S System should be selected, select the Reports Format, and click *Generate Reports*.
Note: Reports Format – CSV is best if saving report in spreadsheet format and HTML is best if just viewing report on screen.

VRF Process for Student Reporting Submission Using SIF

- Click into a report to view. If incorrect data is found corrections must be made in the SIS and a new collection started.

The system reports are a “data dump” by record type of the data that was collected from your SIS. Sometimes it is helpful to see all of the data that is collected by record type for a particular student or course.

Example: If a student has multiple enrollment records, the Enrollment Record system report will show all records for the student. This may be helpful when trying to troubleshoot an entry code error.

Part 5: Moving Data into Student Reporting in Iowa (SRI)

Once all errors have been corrected the data must be moved into Student Reporting in Iowa. This will allow you to view your data through several different reports.

On the main screen, Collection Requests, in VRF Data Collector click *Approve & Submit*. This will move the data into Student Reporting in Iowa where your data will go through another set of validation checks and produce reports for you to view.

Note: If 24 hours have passed since *Validate* was last clicked, the data must be re-validated before it can be moved into Student Reporting in Iowa.
